

Technical Rider for “Red Pants”

“Red Pants” can be performed outdoor as well as indoor under following conditions:

Stage specifications:

6m wide, 5m deep, 5m height. The floor should be flat, even, clean and dry.

Preparation time:

The artists must have access to the stage minimum 2 hours before the show starts.
20 to 30min is needed to rig down and get out of the venue after the show.

PA system:

A PA system should be provided by the venue. A jack cable 3.5mm connected to the PA system has to be in reach from stage. The artists control the music with a remote control from the stage on a computer. We will also use a wireless microphone on stage that has to be connected to the PA system.

Stage light:

If the venue wants stage light, it should be provided by the venue, and tried and discussed before the show.

Transport and arrival:

The artists will come with 1 car, there should be an unloading possibility max. 20m from stage, and a parking possibility on walking distance throughout the performance.

Accommodation:

The venue is responsible to supply the artists with accommodation and parking possibility for one car.
